Reading Useful Books.

As:

- Clean Code by Robert C. Martin

Bayan Al Gousani

Web developer

As an experienced Software Engineer, I have a proven track record of delivering innovative and high-quality web applications. My technical expertise includes proficiency in PHP, MySQL, Laravel, and Vue.js. I am constantly seeking opportunities to expand my skills and stay up-to-date with the latest advancements in the field.

Education

Software Engineering

From September 2016 to September 2021 [Damascus university](#) Syria

I studied the following topics:

- Requirements Engineering.
- Process Model.
- Agile Framework.
- Design Pattern.
- Database.

Web Development

From September 2020 to November 2020 [Creatives Group](#) Syria

I studied the following topics:

- Front-end (HTML, CSS, bootstrap)
- ERD Design
- Laravel Framework
- GIT

Advanced Web Development

From January 2021 to March 2021 [Creatives Group](#) Syria

I studied the following topics:

- API.
- Hosting and Domains.

Work experience

Web developer

Since July 2025 [Emdadat Al-Atta](#) Saudi Arabia

Developing and maintaining a comprehensive ERP system for Emdadat Al-Atta. Responsible for building scalable backend architectures, integrating complex business logic, and optimizing database.

Founder and CEO

Since August 2024 [Baccalaurea app](#) - [تطبيق بكالوريا التعليمي](#) Syria

Founder and CEO of the Baccalaurea app, an innovative application in Syria that allows students to attend all subjects online, with interactive tests for each lesson and interactive quizzes for each unit. This app also provides all the important documents for students.

Web Developer

From September 2022 to September 2024 [UMCH](#) Malaysia

I've worked on [WeHealth](#) system. This electronic system is patented in Malaysia, designed for remote health monitoring, enabling doctors to detect potential health problems early for their patients. It also manages appointments and bookings for patients, doctors, and hospitals, facilitates direct communication between patients and doctors, and allows interaction and follow-up with family and friends, along with many other features. The system works on all devices and platforms, and there is a dedicated mobile app for patients.

My role was refactoring the old code and moving it to the modern version using: php - mysql - Bootstrap 5 - Vuejs 3 - Laravel

PHP Developer

From November 2021 to June 2022 [Clouds Zone](#) Jeddah, Saudi Arabia

- Develop [Clouds Zone](#) website using: WordPress.
- Building OnTime System using: PHP, Laravel, Ajax, JS, JQuery.

OnTime System integrates between importing customer numbers from a Saudi accounting system (aliphia) and sending text messages.
